

2. Clearing the ditch of vegetation between the back of Walnut Tree Cottage/ 50 Pound View and the AW treatment works – this is the landowner's responsibility and will increase flow away from Pound Hill.
3. Clearing of vegetation in ditches in various other locations, including the west side of Turkey Hall Lane (multiple properties / landowners). This is the riparian duty of landowners (home-owners as well as farmland owners).
4. Suffolk County Council as highways authority to clear blocked gullies and drains as these are reported – and respond to emergency floods (as they have been doing).
5. Anglian Water need to invest in capacity in their sewage treatment works. This issue has been raised with them previously and was raised again in a meeting today. (400 new homes in Bacton will provide an increase of approx. £100k/year of income to AW, they also charge homeowners for surface water disposal unless they can prove that this is captured separately e.g. guttering into water butts etc).
